

JOEMAR BELMONTE

AI Automation Specialist | AI Agents | n8n Workflows | Business Automation

Philippines | joemarbeldmonte.automation@gmail.com | +63 927 931 7285 | linkedin.com/in/beldmontejoemar/

PROFESSIONAL SUMMARY

Results-driven AI Automation Specialist with 10+ years of enterprise cybersecurity experience, specializing in business automation, AI agent systems, workflow orchestration, and eCommerce infrastructure. Proven track record of eliminating repetitive work, reducing operational costs, and scaling business operations through AI-powered systems built with Claude, n8n, Make.com, Docker, Shopify, Airtable, and custom integrations. Every automation is designed with a security-first mindset — reliable, auditable, and built for long-term business continuity.

CORE SKILLS

- AI Automation & Workflow Design
- n8n Automation & Orchestration, Make.com
- API Integration & Webhooks
- Python and JavaScript
- Business Process Automation & Process Mapping
- eCommerce Automation (Shopify, CJDropshipping, AliExpress)
- Prompt Engineering
- Docker & Self-Hosted Infrastructure
- Cybersecurity (Web Application Vulnerability Management, Application Security, Penetration Testing, Threat Modeling)

KEY PROJECTS

PR Pulse System — Daily Media Intelligence | Make.com | Claude | Notion

- Daily scheduled Make.com scenario that monitors Google Alerts RSS feeds across multiple clients
- Claude Opus analyzes each media mention for sentiment and drafts a journalist reply in the founder's voice — structured JSON output with no hallucinated formatting
- Conditionally queues Gmail draft if follow-up is warranted; logs all intelligence to a Notion database and delivers a Telegram summary report per client per article

n8n Lead Qualifier | n8n Automation | Gmail + Groq AI

- Triggers on incoming Gmail messages and extracts lead data for AI evaluation
- Scores each lead using Groq AI (HTTP POST), parses the response, and routes via conditional logic
- Qualified leads logged to Airtable; unqualified leads routed to a separate Airtable record with Telegram alert

6-Agent AI Dropshipping System | Production-Grade Multi-Agent Platform

- Production-ready multi-agent platform using Claude API and self-hosted n8n
- Agents cover Product Research, Supplier Research, Ad Creative, Analytics, Store Operations, and Customer Service
- Telegram approval gates for all money-impacting actions — no autonomous spend without human sign-off

DropSignal Trend-to-Store Autopilot | n8n Automation

- Polls multi-source market signals every 4 hours, scores virality, and filters hot product opportunities
- For qualified signals: auto-sources AliExpress supplier, generates product content, creates Shopify product, and launches Facebook campaign — fully unattended
- Delivers launch reports via Slack alert on every successful store push

Trending Products Market Intelligence Agent | n8n LangChain Agent | Webhook API

- Webhook-triggered multi-tool AI agent powered by Claude Sonnet via LangChain orchestration
- Equipped with web search (SerpAPI), Wikipedia, Google Trends, and a profitability calculator tool
- Returns structured market intelligence reports as HTML — callable as a standalone API endpoint

AI Dropshipping Agent | n8n Automation

- Scheduled every 48 hours: uses Claude API to research and evaluate 5 dropshipping product candidates
- Parses and logs structured results to Airtable for tracking and review
- Generates a formatted Telegram report and waits for operator approval before committing any action

Automated Order Logger with Live Status Updates | n8n Automation | Webhook + Google Sheets

- Webhook-triggered on order creation events from any connected storefront
- Dynamically provisions monthly Google Sheets tabs with structured headers on first order of the month
- Appends all orders in real time with full status visibility — zero manual logging required

3D Product Video Generator | n8n Automation | Media Pipeline

- Form-triggered pipeline accepts product image, removes background via external API, and uploads to Google Drive
- Submits to 3D video generation API, polls render status until complete, then retrieves final video link
- Logs video URL and product data to Google Sheets and sends email notification on delivery

MenuCostingAI | AI-Powered SaaS

- AI SaaS for restaurant costing and profitability analysis
- Built with Claude Vision API integration

PROFESSIONAL EXPERIENCE

AI Automation Specialist (Freelance) | January 2026 – Present

- Designed and deployed production-grade multi-agent AI automation systems
- Built n8n workflows integrated with Claude API, Groq, LangChain, Shopify, Airtable, Meta Ads, Google Sheets, and Telegram
- Developed product intelligence tools with live third-party API data and AI-powered scoring
- Created end-to-end eCommerce automation pipelines: trend detection → supplier sourcing → store creation → ad launch
- Built and delivered AI-powered SaaS applications and internal business tools for multiple clients

Senior Cybersecurity Analyst | 10+ Years

- Application Security & Web Application Vulnerability Management
- Penetration Testing & Threat Modeling
- Secure Development Reviews & Risk Assessment
- This background ensures every automation and AI system is built with a security-first, audit-ready architecture
